

Lean Hog Futures and Options

CAPITALIZE ON THE EXTRAORDINARY OPPORTUNITIES OF A GROWING INDUSTRY

Overview

The U.S. pork industry is big business — and risky. Any number of factors, including weather and disease, can lead to an increase or decrease of supply and demand for livestock. Lean hog futures and options traded at CME serve commodity producers and users seeking risk management and hedging tools. They also allow funds and other traders to capitalize on the extraordinary opportunities these markets offer.

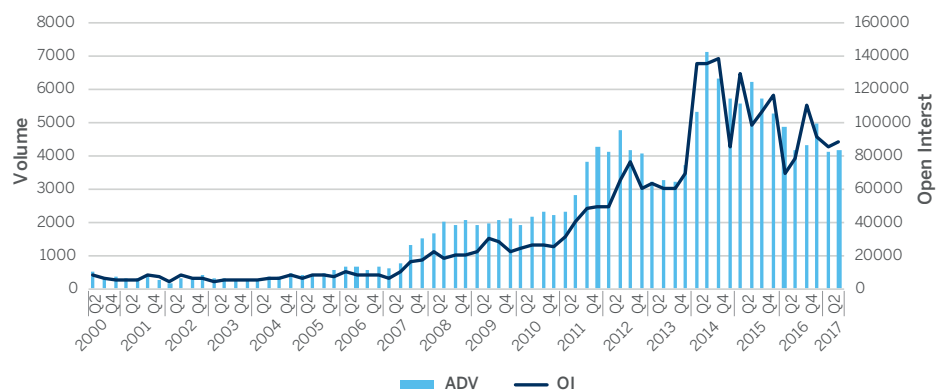

Contracts

Lean Hog futures and options trade electronically on the CME Globex electronic trading platform. Lean Hog futures and options are cash-settled contracts.

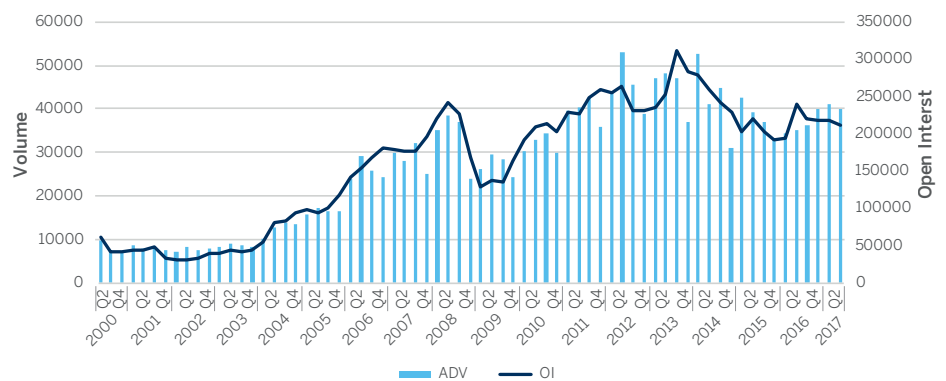

Benefits

- Management of price risk and engagement in price discovery for individual markets
- Access to electronic markets
- Arbitrage and spread opportunities with other commodities, such as grains

Lean Hogs Options Average Daily Volume and Open Interest

FUTURES: Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade. All examples in this brochure are hypothetical situations, used for explanation purposes only, and should not be considered investment advice or the results of actual market experience.
