# Commodity Hedging & Trading

Fall 2022

## Firm Overview

NFC is an experienced firm founded in 2014 serving commercial processors, meat and grain producers, family farms, co-ops and agribusiness customers in North America. Operating out of multiple offices, our team aims to develop dedicated, personal and trusted relationships with the goal of delivering superior hedging, brokerage, risk management and managed futures investing services to every customer.

## NFC Research

Industry-leading research is the backbone of NFC's service offerings. Everything we do starts with great data and analysis. NFC breaks down raw USDA data into easily digestible forms of information that help our clients stay on top of market movements and profit opportunities.

## Risk Management

Managing profitability is what keeps our world leading agribusinesses around for generations. Proper risk management allows our clients to make the most informed marketing decisions throughout each crop year and delivery cycle..

## Crop & Livestock Insurance

As a registered insurance agent through RCIS, a subsidiary of global insurance leader Zurich, NFC provides crop and livestock insurance (LRP & LGM) to production entities in major ag producing states.

## Managed Futures

Diversification is a necessity for everyone's portfolio. NFC's Managed Futures offering allows clients to achieve diversification with the use of CME, CBOT and ICE contracts in. Livestock, Grain, Metals, Equity Indices, Energies and Softs.
